

Corporate Membership

SEFI offers a unique opportunity for industry to join the discussion about the future of Engineering Education and offers a variety of platforms for exchange between Academia and Industry in Europe.

The European Society for Engineering Education is a network of more than 300 members: Higher engineering institutions, professional societies, student associations, students, academic staff, engineers and corporates within Europe and worldwide. It has been actively advocating for quality of the engineering education since 1973.

SEFI OBJECTIVES

- To contribute to the development and improvement of engineering education and the position of the engineering professionals
- To provide appropriate services and promote information about engineering education to our members
- To improve the communication between the various engineering education players
- To promote cooperation between industry and those engaged in the education of the engineers
- To act as an interlocutor between our members and other scientific societies and international organisations
- To promote the European dimension of higher engineering education curricula

"Being a partner in societies such as SEFI provides us with the valuable input needed to enhance our academic offering and to work with leading educators to define, propose and outline strategies for the engineering education trends and challenges. This membership gives us access to the SEFI community through writing articles, participating in panel discussions, workshops and presenting at the SEFI conferences to achieve a mutual goal of accelerating and enhancing Engineering and Science Education."

National Instruments

REASONS TO JOIN SEFI

VISIBILITY

Stand out and get noticed in the engineering education community. Be recognized as a supporter of the cause.

LEARNING

Get the latest information about the current trends in higher engineering education.

NETWORKING

Meet like-minded professionals and stakeholders interested in improving engineering education around Europe.

IMPACT

Influence the way engineers are educated express your opinion and discuss specific issues with academics and faculty managers.

"Our partnership with SEFI provides the opportunity to engage more deeply with leadership from universities across Europe and other SEFI members about the trends and challenges impacting engineering education and to exchange ideas and knowledge about how to address these issues with insights into industry best practices. We participate in a range of panels, workshops, presentations and tutorials on topics that align with SEFI's mission of developing engineering education excellence and demonstrate our commitment to changing the world by accelerating the pace of discovery and learning in engineering and science."

Mathworks

"By gathering leaders and educational innovators from all countries of Europe, SEFI has provided us with numerous opportunities to elevate our conversations with academia to the level of strategic considerations that matter to institutions when it comes to the digital transformation of education and to enhancing graduates' readiness to address the industry of the future. Quality interactions with the educational innovators who constitute the core of SEFI's membership, have fueled our uninterrupted commitment to the Society during the ten last years."

Dassault Systemes

Corporate Membership

Join the SEFI and become part of the largest network of higher engineering education in Europe!

Each corporate member will:

- Have access to bi-monthly scientific European Journal of Engineering Education (EJEE), Monthly Newsletter, Weekly Press Review
- Impact policies that improve the quality of engineering education
- Network with academics, students from engineering education institutions, interested in engineering education best practices
- Have opportunity to participate in Working Groups
- Gain possibility to attend SEFI Events for member fees

SEFI offers three types of corporate cooperation:

Corporate Partner

- Free access for two participants and a stand at one selected SEFI event
- Participation in the University-Business plenary session at the Annual Conference
- Company logo at SEFI homepage and on SEFI publications
- Opportunity to publish articles and to advertise in SEFI newsletter
- Opportunity to discuss overall strategies of SEFI

Corporate Member

- Free access for one participant and a stand at one selected SEFI event
- Link to company web at SEFI website
- Invitation to participate in SEFI activities

Working Group Supporter

- Support and participation in a selected working group
- Free access for one participant to the supported working group event
- Link to company web at the working group website

SEFI is always open to discussion in order to tailor to corporate cooperation to your company's interests. With requests for cooperation please contact SEFI Secretary General, Mrs Françoise Côme at francoise.come@sefi.be.
