

Continuing Engineering Education and Lifelong Learning

The group is one of the organisers of the A-STEP 2030 project together with the SIG on Attractiveness.

Furthermore, the chair organized knowledge sharing session at Aalborg University at the Copenhagen Campus the 9 and 10 of January 2020.

Some of the topics we discussed at the two-days meeting were:

- Status quo of Lifelong Learning in different countries: Challenges and solutions
- Work-based Learning and professional practices: newest insights, educational research
- Lifelong Learning awareness and the role of innovation transfer from academia (training programs, incubators, licensing, joint ventures, start-ups, spin-outs)
- Reskilling Revolution: tasks and responsibilities of universities to foster industrial growth and profitability
- Drivers and barriers for professional development: the role of SME/university relationships in innovation-related activities
- Mega projects as learning context for post-graduates
- Learning communities and Innovation frameworks: interaction among industry, institutions and government to exploit knowledge and cooperation

Chair: Bente Norgaard
